## About Me

---

Highly motivated and results-driven Software Engineer with proven ability. I'm an effective communicator and efficient problem solver. My expertise in Java, Python, and Web Development with Angular allow me to quickly identify and resolve complex issues. My passion for software development always ensures my ability to pick up new skills and tools for any project where it is needed. I am eager to join an organization where I can continue to grow my skill-set.

## Relevant Experience & Projects

---

### Portfolio Website

Personal Project

Created a web app to act as a portfolio for my personal projects.

- Created Angular components for each part of the web app, ensuring simplicity and modular design so the web app could be expanded if necessary
- Created a filtering system to allow the ability to filter projects by their Languages and Frameworks
